Should Fix:

Reduce server response time

In our test, your server responded in 1.3 seconds.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

Optimize images

Properly formatting and compressing images can save many bytes of data.

Mobile

[Optimize the following images](#) to reduce their size by 186.3KiB (58% reduction).

- Compressing and resizing <http://prosvet26.ru/images/portfolio2018/6.jpg> could save 149.5KiB (95% reduction).
- Compressing <http://prosvet26.ru/images/portfolio2018/10.jpg> could save 19.5KiB (22% reduction).
- Compressing <http://prosvet26.ru/images/3dd1a23853cb2397fa7099826c168ae6.jpg> could save 8.7KiB (24% reduction).
- Compressing <http://prosvet26.ru/images/Logo3.png> could save 2.7KiB (28% reduction).
- Compressing <http://prosvet26.ru/images/brand-6.png> could save 1.4KiB (22% reduction).
- Compressing <http://prosvet26.ru/images/2019/02/12/icon1.png> could save 1.4KiB (21% reduction).
- Compressing <http://prosvet26.ru/images/logo-1.png> could save 1.1KiB (27% reduction).
- Compressing <http://prosvet26.ru/images/brand-1.png> could save 959B (20% reduction).
- Compressing http://prosvet26.ru/modules/mod_djimageslider/themes/default/images/next.png could save 292B (38% reduction).
- Compressing http://prosvet26.ru/modules/mod_djimageslider/themes/default/images/prev.png could save 286B (38% reduction).
- Compressing http://prosvet26.ru/modules/mod_djimageslider/themes/default/images/play.png could save 266B (31% reduction).
- Compressing http://prosvet26.ru/modules/mod_djimageslider/themes/default/images/pause.png could save 223B (37% reduction).

Consider Fixing:

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 87.1KiB (66% reduction).

Mobile

- Compressing <https://show.enquiz.io/js/quizloader.js> could save 87.1KiB (66% reduction).

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://show.enquiz.io/js/quizloader.js> (expiration not specified)
- <https://mc.yandex.ru/metrika/advert.gif> (60 minutes)
- <https://mc.yandex.ru/metrika/tag.js> (60 minutes)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 656B (23% reduction).

- Minifying http://prosvet26.ru/modules/mod_stcarousel/assets/css/st.carousel.css could save 454B (31% reduction) after compression.
- Minifying http://prosvet26.ru/modules/mod_joomly_callback/css/callback_default.css could save 202B (15% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

Mobile

[Minify JavaScript](#) for the following resources to reduce their size by 352B (18% reduction).

- Minifying http://prosvet26.ru/modules/mod_joomly_callback/js/callback_default.js could save 352B (18% reduction) after compression.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- http://prosvet26.ru/media/com_convertforms/css/convertforms.css?v=2.2.0

3 Passed Rules

Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

Minify HTML

Your HTML is minified. Learn more about [minifying HTML](#).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

99 / 100 User Experience

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `` is close to 2 other tap targets.

4 Passed Rules

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

Size content to viewport

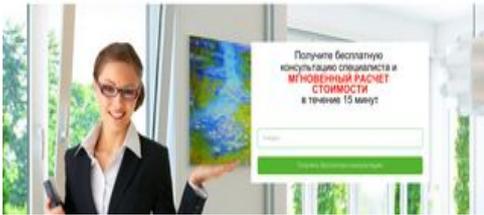

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

Use legible font sizes

Mobile

The text on your page is legible. Learn more about [using legible font sizes](#).

Desktop

61 / 100 Speed

 Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 11 blocking script resources and 8 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.
